

Advanced Methods MSc Climate & Environmental Sciences - Soil Lab Analysis WS 19/20

Scheduled: 07.02.2020 - 14.02.2020

Location: Soil Lab of the Institute of Geography, Bismarckstr. 1

First meeting: Wednesday, Oct 16th 2019, 14:30 st in Room No 3.145 at
Tennenlohe

Compulsatory!

The application-oriented training course includes one day training of soil sampling methods in the field (presumably in October 2017), a priming seminar in the lab (blocked, Friday, Feb 7th 2020, 10 am, open end), the application of different soil physical and chemical analytical methods, and an analysis instrument training. The course concludes with a detailed report on data evaluation and interpretation.
