Confronting Climate Change – from Science to Policy

International Bachelor Summer School for Climate Change Research, 2–13 August 2021

The latest report published by the Intergovernmental Panel on Climate Change states that “climate change is clear” – a conclusion that was accepted and agreed upon by each participating government. This global and highly complex challenge can best be understood and addressed by adopting an interdisciplinary perspective.

The International Bachelor Summer School for Climate Change Research invites highly motivated bachelor students (semester 4 to 6) from different disciplines to participate in the course which is being held under the umbrella of Climate Change Research. The Summer School focuses on the following topics: the physical climate system, climate economics and governance and knowledge transfer. It comprises keynote lectures that are held by high-profile scientists; workshops to train and sharpen students’ disciplinary competence; and a simulation exercise of a multi-lateral climate conference that will be run by the students themselves. A field trip to the high altitude research station Jungfrauoch (3500 m a.s.l.) will provide insights into latest measurement technologies, as well as to the impacts of climate change. Students will have the opportunity to experience one of Switzerland’s most spectacular places: the Aletsch – the largest Alpine Glacier.

Keynote Lecturers

Thomas Stocker, Olivia Romppainen-Martius, Joseph Francois, Karin Ingold, Ralph Winkler, Manfred Elsig, Peter Van den Bossche, Jörg Franke, Christoph Raible, et al.

Venue

University of Bern, Bern, Switzerland

Fees

Early bird registration 500 CHF, regular registration 550 CHF
The registration fee includes course participation, the field trip to the Aletsch Glacier, an “icebreaker” and final drinks reception, supervision and materials. Accommodation (additional): 410 CHF

Registration deadline

Early bird 18 April 2021, regular deadline 16 May 2021
