

Advanced Methods MSc Climate & Environmental Sciences - Soil Lab Analysis WS 21/22

Scheduled: 14.02.2022 - 18.02.2022

Location: Soil Lab of the Institute of Geography, Bismarckstr. 1

First meeting: Wednesday, Oct 20th 2021, 08:15 via zoom

Compulsatory!

The application-oriented training course includes one day training of soil sampling methods in the field (presumably in October 2021, if no Covid-19 restrictions), a priming seminar in the lab (blocked, Friday, Feb 11th 2022, 10 am, open end), the application of different soil physical and chemical analytical methods, and an analysis instrument training. The course concludes with a detailed report on data evaluation and interpretation.
